

25X1A

4 December 1946

SUBJECT: Retirement or unemployment funds

25X1A

TO

Special Funds Branch

1. Our employees are suddenly becoming acutely concerned about the future and are descending in force upon the Special Funds office with inquiries and demands for information and guidance on the matters of

- a) Retirement fund
- b) Social security

2. There is little concrete evidence of what the proper current story is in our files. The general understanding is that retirement deductions are made or not at the option of the employee, but there is no knowledge of any tie-in of social security to civil service.

3. Will you please furnish all the most recent information on these matters at your earliest convenience. Many of our people profess the desire to provide occupational insurance. We need also the relationship between the pre-war social security status to the present one of most individuals.
